I believe in finding practical solutions that make a difference.

As your 3rd District County Commissioner, I am committed to listening to residents, supporting the employees, our wonderful school district, public safety, all while working to build a stronger future. I never make decisions without doing research and knowing the facts. We should always do what is right and support what is best for all of Cheatham County. Common balance is the key. My approach to leadership is straightforward: serve with integrity, honesty, transparency, and always do what is best for Cheatham County.
